

The eLearner

An eLearner is anyone who uses a computer in order to access information in order to gain knowledge. These learners are typically those who need readily available information and in an easily accessible manner.

Computer Based Training

eLearning provides consistent, accurate information delivered in a just-in-time method. A blended solution of instructor-led training and eLearning is often times a fundamental key to the success of building each employee's skill set.

Benefits of providing eLearning courses to your organization:

- Save \$\$ and time! Staff will not have to go offsite for training
- Courses are conveniently available at anytime
- Multiple locations can access the course simultaneously
- Provides a consistent message
- Trainer's time can be focused on instructor-led subject matter

The Solution

When custom eLearning development is the answer, let ExecuTrain help. We will put our professional custom development services in place to create the proper solution for you.

Our services include:

- Organization of Content
- Storyboard
- Instructional Design
- Graphical User Interface
- Interactive Exercises
- Scenario Driven Applications
- Test Assessment and Tracking
- Learning Management System

Courses can be delivered to the learners either online or offline whether by CD, EXE, HTML, or through a Learning Management System (LMS) that meets both AICC and SCORM standards.
